### Assembly Steps

07

- Insert the output controller RD6006 and keep clamped in the mounting hole

- Connect the FireWires(L) of power switch and switching power supply with the brown wire

- Connect the FireWires(L) of power switch and power socket with the brown wire

- Connect the Neutral wires(N) of switching power supply and power socket with the blue wire

- Connect the Ground wire of power socket (E) to the Ground wires of switching power supply (≡) with the double color wire

- Connect the power line of the fan to the output terminals of the switching power supply, and insert the 2 pin power supply wire of the fan into the holder

- Assemble the upper cover plate and fix with the screws(1), Mount the pads with the screws(2)

**NOTE:**  
 1. The wiring requests a high level of expertise, non-professionals must not operate, otherwise, there is a risk of fire and explosion.  
 2. Please check and switch the input power 110V or 220V before power on to avoid damage
